一般入試A日程 問題

＜給費対象者選抜を兼ねる＞

「英 語」

注 意 事 項

1. 問題用紙は合図があるまで中を見ないでください。
2. 問題用紙および解答用紙に、受験番号および氏名を必ず記入してください。
3. 解答は、すべて解答用紙に記入してください。
4. 試験時間は60分です。
5. 印刷に不鮮明な所がある場合は、挙手して知らせてください。
6. 試験終了後、問題用紙および解答用紙を回収します。
回収が終わるまで、席を立たないでください。

受験番号		氏 名	
------	--	-----	--

III. 次の (11) ～ (13) の英文を日本語に訳しなさい。

(11) She studied science so hard that she became a scientist.

(12) Let me think about it.

(13) Are you free this afternoon so I can call you?

IV. 次の (14) ～ (15) の会話を読んで、与えられた質問に対する最も適切な答をア～エの中から一つ選び、その記号を書きなさい。

(14)

Bob: Thank you for inviting me.

John: I am glad to have you here. Would you like something to drink, Bob?

Bob: Yes. Can I have some coffee?

John: Sure.

Question: Where are they?

ア. It seems that they are at John's house.

イ. It seems that they are at Bob's house.

ウ. It seems that they are in a park.

エ. It seems that they are in a parking lot.

(15)

Tim: You really liked this factory tour, didn't you?

Jane: Right. I love to learn how they operate. How did you like it?

Tim: To be honest, it was boring.

Question: Did Tim like the factory tour?

ア. Not at all.

イ. Very much.

ウ. Yes, he loved it.

エ. He enjoyed it a lot.

V. 下記の文章を読み、問に答えなさい。

AI is becoming an important tool in schools. It can also help students learn English in many ways. One of its good points is that AI can always be someone to talk with. It listens to you and answers at your level, so you can practice real English communication. With AI, learning is not only about remembering correct answers, but also about using English naturally in many situations. One good way to practice with AI is to do role play without a script. In this activity, you only get a situation, such as “ordering food in a restaurant.” You must think and speak for yourself.

This kind of practice helps in many ways:

1. It helps you answer quickly, because you have to think on the spot.
2. It helps you say things in different ways, because every talk is different.
3. It helps you learn polite and natural English when talking with others.

There are no fixed answers, so you need to use your own words and ideas. When you do well, you feel sure of yourself. Even when you have a hard time, it becomes a chance to learn something new. This makes you want to keep learning more.

In short, practicing English with AI through role play without a script is a fun and good way to build your confidence, be flexible, and use real communication skills.

以下の各文が本文の内容と一致すればTを、一致していなければFを書きなさい。

- (16) AI can only be used for math and science, not for English learning.
- (17) AI can talk with students and help them practice real English communication.
- (18) In role play without a script, students must think and speak for themselves.
- (19) If students make mistakes while practicing with AI, they should stop learning.
- (20) Practicing English with AI helps students become more confident and flexible.

VI. 以下の対話文を読み、下線部を日本語にしてください。

Student (S): Sensei, why are we using AI in our English class? Isn't it better to just study with textbooks?

Teacher (T): That's a good question. Textbooks are important, but AI gives us something extra.

(21) It can talk with you anytime, like a real conversation partner.

S : A conversation partner? But it's just a machine, right?

T : True, but (22) it listens to your English and answers at your level. That means you can practice in a way that feels like real communication, not just memorizing sentences.

S : So it's more like practicing with a foreign friend?

T : Exactly. For example, in improvisational role play, I only give you a situation, like "ordering food in a restaurant." (23) You have no script—you must think and speak on the spot.

S : That sounds difficult. What if I make mistakes?

T : Mistakes are fine. AI will respond naturally, and those mistakes become learning opportunities.

(24) Each time you try, you'll feel more confident and use English more freely.

S : I see. So AI helps us not only learn words but also use them in real situations.

T : Yes. (25) That's why AI is important in English learning.
